

Complete design-to-deploy solution that integrates the

BORLAND® DELPHI™ 7 STUDIO

modeling, development, and deployment of e-business solutions.

Borland® Delphi™ 7 Studio Enterprise delivers integrated technologies for increased developer productivity: visual modeling based on UML™ technology, integrated visual Web development, and visual, code-based report designers. Get equipped for Microsoft® .NET with the Delphi 7 Studio migration kit. Take applications cross-platform to Linux® with the included Borland Kylix™ 3 for Delphi environment.

Top reasons to buy Borland Delphi 7 Studio

Ready your Borland Delphi applications for Microsoft .NET and start compiling for .NET today

The Delphi 7 Studio migration kit provides compatibility hints and warnings to assist in getting your Delphi applications ready for the path to .NET. Then leverage existing Delphi language skills to create .NET managed applications today with the included Delphi for Microsoft .NET prerelease CD-ROM.

Design and model applications with UML technology

Architect your application efficiently with visual modeling and refactoring based in UML. The ModelMaker modeling environment provides native Delphi integration, reverse engineering, and instant visualization that allows you to produce high-quality designs and code.

Enter new markets and potentially increase your return on investment

Use Delphi 7 Studio to build native database, GUI, Web, and Web Services applications for Windows® that can be recompiled to the Linux® platform with the included Borland Kylix™ 3 for Delphi development.

Deliver your Delphi applications to the Web faster

Save time and energy; enable AToZed Software IntraWeb to do the work for you when rapidly and visually building dynamic server-side HTML Web applications. Fully integrated with Delphi 7 Studio, IntraWeb allows you to deploy your application to an intranet, or extranet, utilizing drag-and-drop visual Web application development.

Deliver powerful reports faster

Reports are the primary means for your customers to retrieve information about their data. The added flexibility and speed of Rave Reports Borland Edition (BE) from Nevrona combines Rave visual and code-based report designers, a Rave server, SQL drivers for database interfaces, and support for multiple databases. Utilize Rave Reports BE with both the Delphi 7 Studio and included Kylix 3 environments for cross-platform reporting.

BORLAND® DELPHI™ 7 STUDIO	Architect	Enterprise	Professional	Personal*
New! Interoperability and migration support for Microsoft® .NET				
New! Delphi™ compiler warnings and hints for .NET compatibility	•	•	•	•
New! Import any .NET assembly as a COM object	•	•	•	•
New! Use Delphi COM objects in .NET managed applications	•	•	•	
New! Delphi™ for Microsoft® .NET prerelease preview				
New! .NET preview CIL compiler for the Delphi language to create managed applications	•	•	•	•
New! .NET migration documentation	•	•	•	•
New! ModelMaker technology				
New! Model-driven design	•	•		
New! Visual modeling and refactoring tool based on UML™ technology	•	•		
New! Native Delphi integration, reverse engineering, and instant visualization	•	•		
New! AToZed Software IntraWeb technology				
New! Deploy your application to the Internet utilizing drag-and-drop visual Web application development	•	•	•	
New! Add interactive content to your Web sites by rapidly and visually building dynamic server-side HTML Web applications	•	•	•	
New! Transparently manages Web application details such as cookie, session, and user management	•	•		
New! Nevrona Rave™ Reports Borland Edition				
New! Powerful Rave Reports Borland Edition visual report designer and code-based API	•	•	•	
New! PDF, HTML, RTF, and text rendering formats	•	•	•	
New! Native support for Borland® VCL (Visual Component Library) and CLX™ (Component Library for Cross-platform) applications	•	•	•	
New! Bold® for Delphi™				
New! Maintain less code with a true Model Driven Architecture™ (MDA™)	•			
New! UML technology: full support for class diagrams, tagged values, stereotypes, associations (aggregates, compositions), cardinality, visibility, and mixed transient/persistent elements and classes	•			
New! Integrated support for Rational Rose® and ModelMaker; import/export model information from/to Bold Model Editor	•			
New! Windows XP™ Themes				
New! Enable applications to take part of Windows XP Themes with a look that will blend in with your favorite Windows XP theme	•	•	•	•
New! Take full advantage of the new Windows XP look for the Windows® common controls library (comctrls.dll version 6.0)	•	•	•	•
BizSnap™–Web Services with XML technologies				
New! UDDI browser to visually locate and import registered Web Services	•	•	•	
New! Automatic UDDI client fail-over support	•	•	•
